NORTHERN COALFIELDS LIMITED · CIVIL DEPARTMENT

Colony Maintenance Portal

Scenario book — every case the portal handles, how the workflow runs, and a checklist for manual verification before the presentation to management.

62	188	11	9
scenarios	manual checks	complaint states	controls verified

Version of 7 October 2026 · build fb78101 · 115 API endpoints · 826 automated tests passing

Tester: _____ Date: _____ Area / environment: _____

How to use this book

Reading a scenario

Each scenario names **who** acts, what must be true **before you start**, the **workflow** step by step (**people** in teal, what the portal does in blue), and the **expected** result. The right-hand column is the manual checklist: tick each line, then mark Pass or Fail.

Negative checks

Lines in red (marked ✕) are things the portal must **refuse or not show**. Try each one deliberately — a control is only proved when the wrong action is attempted and refused.

Signing in for testing

Web portal: **http://localhost:5173**. "This phone" acts as a registered handset (development only); "Employee ID" uses the 8-digit ID and password. Inspection acceptance needs "This phone".

Test data

Use a quarter and supervisor set up for testing. History is permanent by design: test complaints cannot be deleted afterwards, so use a test environment rather than live Area data.

Contents

—	Roles, the complaint lifecycle and the nine controls	
A	Access, registration and sign-in	9 scenarios
B	People and roles	4 scenarios
C	Raising a complaint	4 scenarios
D	Verification, rejection and assignment	6 scenarios
E	Contractor's work	5 scenarios
F	Resident during the work	2 scenarios
G	Inspection and closure	6 scenarios
H	Resident after the work	3 scenarios
J	Disputes decided in writing by the Staff Officer	4 scenarios
K	Special repair, SLA and escalation	3 scenarios
L	Job card	2 scenarios
M	Work orders and contracts	3 scenarios
N	Materials reports and master	2 scenarios
P	Dashboards, search and notifications	5 scenarios
S	Administration and the controls themselves	4 scenarios
—	Summary and sign-off	

Who uses the portal

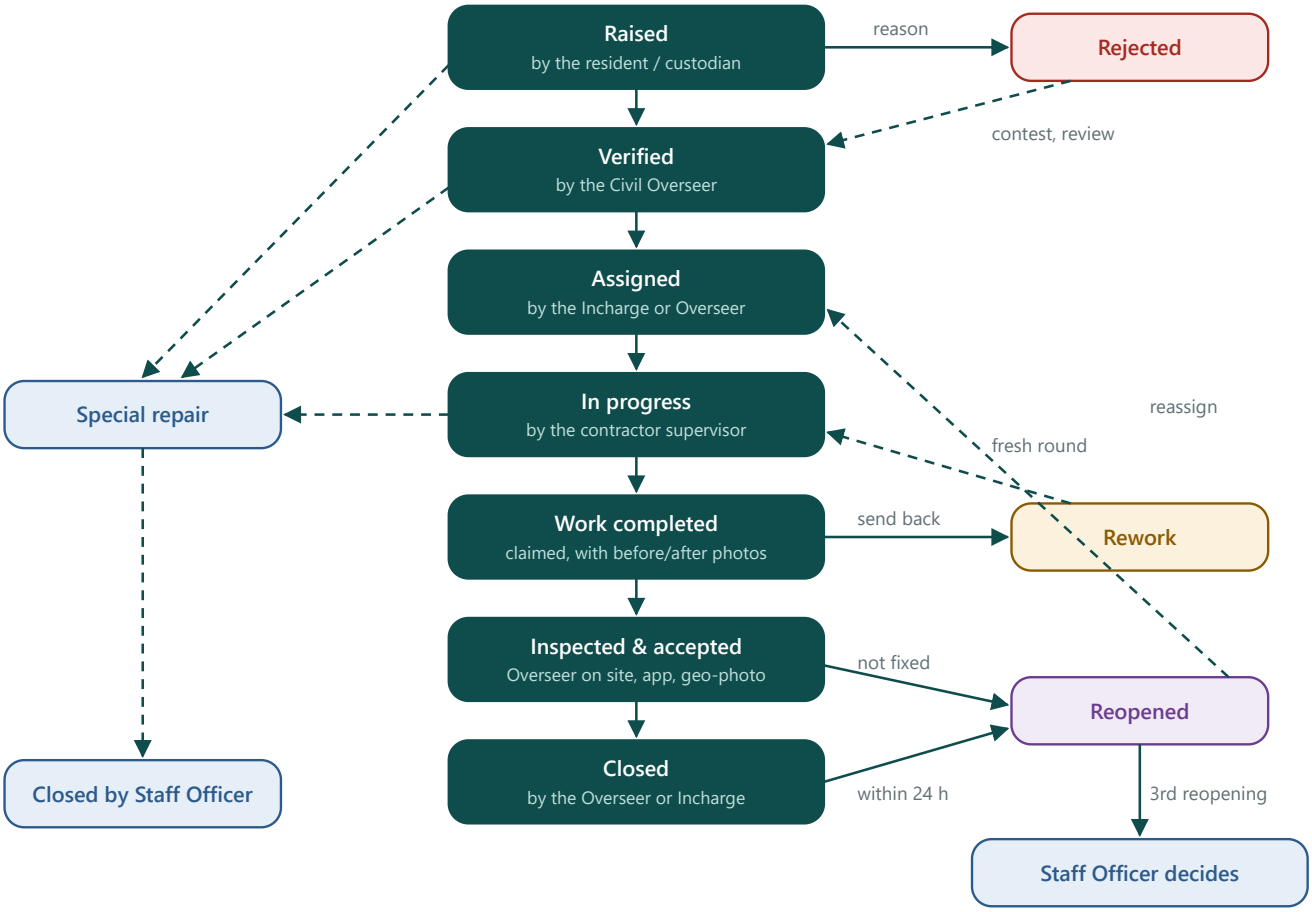

Role	Sees	Does
Resident / Custodian	Own quarter or building	Raises, tracks, objects, confirms, rates, reopens, contests a rejection once
Contractor (firm)	Own contract	Reads own work order, jobs and scorecard
Contractor Supervisor	Jobs assigned to them	Starts work, names workmen, records materials, before/after photos, claims completion
Civil Colony Overseer	Own Area	Verifies, rejects, assigns, answers objections, inspects on site, closes, verifies materials, keeps the job card
Civil Colony Incharge	Own Area	Approves resident registrations, assigns, keeps work orders, appoints supervisors, reviews disputes, first escalation
Area Civil Staff Officer	Own Area	Second escalation, contract oversight, special repair, written decision on disputes
Area HR / System Administrator	Own Area	Enters people, assigns roles below own rank, approves officials' phones
GM Civil, Directors, CMD	All Areas, read-only	Monitoring, HQ overview, final escalation level
HQ System Administrator	System-wide	Settings, SLA figures, masters, dashboards — cannot move complaints or edit counters

Roles belong to people. One person may hold several (an Overseer is also a resident of their quarter) and switches between them; every act is recorded against the role and the person. Escalation runs Overseer → Incharge → Staff Officer → GM.

The nine controls these scenarios prove

1. **Two-key closure** — the contractor only claims; only the Civil Overseer closes, after physical inspection from the app; never the person the work was assigned to.
2. **Inspection photographs in the app** — location and time embedded at capture; the Overseer's own, after the claim; no gallery.
3. **Area isolation by the database** — another Area's complaint is "not found" by any route.
4. **Fixed field authority** — SLA figures, deadlines and counters changed by no person, administrator included.
5. **Every state change checked** — against a table of who may make it; anything not listed is refused.
6. **Only two pauses** — occupant and force majeure, recorded only by an officer. Want of material or labour is the contractor's obligation.
7. **History and audit are permanent** — never edited or deleted; only the two-year retention purge.
8. **Department sets the inspection order** — emergencies, priority, premises type, verification date — never the contractor's claim.
9. **Evidence only** — no penalty, damages, rate or bill is calculated anywhere.

How a complaint moves

Teal: the main path. Red, amber, purple, blue: rejection, rework, reopening, decisions above the contract. Dashed lines return the complaint into the main path.

Who may make each move

From	To	Only by
Raised	→ Verified / Rejected / Special repair	Civil Overseer
Verified	→ Assigned	Incharge or Overseer
Verified	→ Special repair	Incharge
Assigned	→ In progress	Contractor Supervisor
Assigned	→ Assigned (reassign)	Incharge or Overseer
In progress	→ Work completed (claim)	Contractor Supervisor
In progress	→ Special repair	Overseer or Staff Officer
Work completed	→ Inspected & accepted / Rework	Civil Overseer (app only)
Rework	→ In progress	Contractor Supervisor

Inspected & accepted	→ Closed	Overseer or Incharge
Inspected & accepted	→ Reopened ("not fixed")	Resident / Custodian
Closed	→ Reopened (within 24 h)	Resident / Custodian
Rejected	→ Raised (reinstated on review)	Overseer, Incharge or Staff Officer — only through a dispute review
Reopened	→ Assigned	Incharge or Overseer — not while a Staff Officer decision is pending
Reopened	→ Closed / Special repair	Staff Officer — only by written decision
Special repair	→ Closed	Staff Officer

Any move not in this table is refused by the database — the administrator included.

A Access, registration and sign-in

How people get into the portal. The phone is the credential: an approved installation holds a key that cannot be copied off the handset. NCL employees may also sign in on the web with their 8-digit Employee ID and password. Roles belong to people, not phones.

A1 Resident registers a phone for their quarter

Decision 13, 14, §5.4 mobile verification

Who: Resident (NCL or Non-NCL), Civil Colony Incharge
Before you start: The quarter exists in the premises register; fewer than 3 active phones on it.

1. **Resident:** Opens the portal, chooses Register, picks "Resident", colony and quarter.
2. **Resident:** Enters mobile number and requests an OTP; enters the OTP received.
3. System: Records the mobile number that was proved by the OTP, not the one typed. Registration goes into the Incharge's queue showing the role requested.
4. **Incharge:** Registrations → reviews name, quarter and role → Approve (may correct details), Reject, or Refer for site check to the Overseer.
5. System: On approval the phone is bound to the person and the Resident role on that quarter. The resident can now sign in.

Expected: Resident lands on "My quarter — B-xxx" home after sign-in.

MANUAL CHECK

- ☐ Registration cannot proceed without a correct OTP; a wrong OTP is refused
- ☐ The approval screen shows the role requested
- ☐ Approved resident sees only their own quarter's complaints
- ☐ A 4th active phone on the same quarter is refused at approval (limit 3, configurable)
- ☐ ✕ the resident cannot approve their own registration
- ☐ ✕ registration cannot request Administrator or GM roles

☐ Pass ☐ Fail Remarks

A2 Custodian registers for a non-residential building

Decision 27 (revised 2026-09-30)

Who: Custodian, Incharge
Before you start: Building is set up as custodian-bound (e.g. Guest House).

1. **Custodian:** Register → Custodian → chooses the building from the list → OTP.
2. **Incharge:** Approves in Registrations.
3. System: Custodian raises and confirms complaints for that building exactly as a resident does for a quarter.

Expected: Custodian sees only that building.

MANUAL CHECK

- ☐ Custodian option lists only buildings of the chosen colony
- ☐ Custodian can raise, confirm, rate and reopen for that building
- ☐ ✕ buildings under direct department control (no custodian) offer no occupant confirmation

☐ Pass ☐ Fail Remarks

A3 Official or contractor registers a phone

Decision §5.4 who approves which device; §5.5 contractor supervisors

Who: Officer / supervisor, Area Administrator (or Incharge for supervisors)
Before you start: Area HR office has entered the person and given them a role.

1. **Official:** Register → "Official / contractor" → mobile and OTP. No role is chosen here; roles come from the Area HR office.
2. System: Officer phones go to the Area Administrator's queue; a contractor supervisor's phone goes to the Incharge.
3. **Approver:** Approves. Phone now carries all of that person's roles.

Expected: Official signs in and sees the role picker if they hold more than one role.

MANUAL CHECK

- ☐ Officer phone appears in the Area Administrator's queue, not the Incharge's
- ☐ Supervisor phone appears in the Incharge's queue
- ☐ ✕ Incharge cannot approve an officer's phone
- ☐ ✕ GM and HQ Administrator cannot be registered at all (set up centrally)

☐ Pass ☐ Fail Remarks

A4 Registration rejected or referred for site check

Registration controls

Who: Incharge, Civil Overseer
Before you start: Pending registration.

1. **Incharge:** Reject (reason) — or Refer for site check, which sends it to the Overseer for field confirmation.
2. **Overseer:** Confirms on site; the Incharge then approves or rejects.

Expected: Rejected applicant cannot sign in.

MANUAL CHECK

- ☐ Rejection needs a reason
- ☐ Referred registration is visible to the Overseer
- ☐ Rejected phone cannot obtain a sign-in

☐ Pass ☐ Fail Remarks

A5 Sign in with the phone (app) and choose a role

Decision 13, 15, §5.5 role switch

Who: Any registered person
Before you start: Approved phone.

1. **User:** Sign in → "This phone" → the phone signs a one-time challenge with its key.
2. System: If the person holds one role they land straight in it; otherwise the role picker is shown ("Civil Colony Overseer · Jayant", "My quarter — D-12").
3. **User:** Officials and contractor supervisors are asked for PIN/biometric on choosing an official role.

Expected: Home screen of the chosen role.

MANUAL CHECK

- ☐ Role picker lists every role the person holds
- ☐ Official role asks for PIN/biometric again
- ☐ Resident role does not ask for a PIN

☐ Pass ☐ Fail Remarks

A6 Sign in on the web with Employee ID and password

Decision §5.5 sign-in; control 1

Who: NCL employee
Before you start: Password set.

1. **Employee:** Sign in → "Employee ID" tab → 8-digit Employee ID and password.
2. System: Five wrong attempts lock the ID for 15 minutes. Every attempt is logged.
3. **Employee:** Chooses role.

Expected: Officer works on the web; inspection acceptance is withheld (needs the app).

MANUAL CHECK

- ☐ Field accepts digits only and stops at 8; Sign in stays disabled until 8 digits
- ☐ Wrong password 5 times → locked for 15 minutes with a clear message
- ☐ ✕ a Non-NCL resident or contractor cannot hold a web password
- ☐ ✕ "Inspect and accept" is not offered in a password session

☐ Pass ☐ Fail Remarks

A7 Set or reset the web password

§5.5 sign-in

Who: NCL employee
Before you start: Mobile on record.

1. **Employee:** Employee ID tab → Set or reset password → Employee ID + mobile on record → OTP → new password twice.

Expected: Employee can sign in with the new password.

MANUAL CHECK

- ☐ OTP goes only to the mobile on record
- ☐ Mismatched passwords are refused
- ☐ Old password no longer works

☐ Pass ☐ Fail Remarks

A8 Switch role without signing out

§5.5 role switch

Who: Person holding several roles
Before you start: Signed in.

1. **User:** Header → role switcher → chooses another role.
2. System: Issues a token for that one role; official role asks for PIN again; lands on that role's home with a toast.

Expected: Every act afterwards is recorded against the new role and the person.

MANUAL CHECK

- ☐ Current role is marked in the switcher
- ☐ Actions taken show the role in which they were done in history

☐ Pass ☐ Fail Remarks

A9 Revoke a device

Identity controls

Who: Area Administrator
Before you start: Active phone.

1. **Administrator:** Administration → Devices → Revoke (single or bulk).
2. System: Phone can no longer sign in; its history stays.

Expected: Revoked phone is refused at sign-in.

MANUAL CHECK

- [ ] Revoked phone cannot sign in
- [ ] Bulk revoke works on several devices
- [ ] History of past actions by that phone remains

☐ Pass ☐ Fail Remarks

B People and roles

Area administrators enter people and assign roles inside their own Area, below their own rank, never to themselves. The one exception: the Civil Incharge appoints contractor supervisors directly.

B1 Area administrator adds a person and assigns a role

§5.5 users and roles

Who: Area HR / System Administrator
Before you start: Signed in as Area administrator.

1. **Admin:** People and roles → Add person (name, 8-digit Employee ID for NCL, mobile, category).
2. **Admin:** Assign a role: only roles below one's own rank are offered; quarter/building for occupant roles, contract for contractor roles; designation, acting flag, validity, reason.
3. System: Audit-logged with reason.

Expected: Person appears with role chips; can register a phone.

MANUAL CHECK

- ☐ Role list offers only roles below the admin's rank
- ☐ Reason is compulsory
- ☐ Entry appears in the Audit trail tab
- ☐ ✕ admin cannot assign a role to themselves
- ☐ ✕ admin cannot assign in another Area
- ☐ ✕ Employee ID other than 8 digits is refused

☐ Pass ☐ Fail Remarks

B2 Change, end or correct a role / person

§5.5

Who: Area administrator
Before you start: Existing assignment.

1. **Admin:** Change (end date, designation, contract) or End the role, with reason; or Correct details of a person with reason.
2. System: Old and new values kept in the audit trail.

Expected: Ended role disappears from the person's role picker.

MANUAL CHECK

- ☐ Reason compulsory for each change
- ☐ Audit shows old → new
- ☐ Ended role can no longer be selected at sign-in

☐ Pass ☐ Fail Remarks

B3 Incharge appoints a contractor supervisor

§5.5 contractor supervisors

Who: Civil Incharge
Before you start: Live work order in the Area.

1. **Incharge:** Work orders → contract → Name a supervisor → Existing supervisor, or New supervisor (name, mobile, designation, reason).
2. **Supervisor:** Registers their phone as "Official / contractor" with that mobile.
3. **Incharge:** Approves the phone in Registrations. Later may End the supervisor role with reason.

Expected: Supervisor signs in as Contractor Supervisor of that contract.

MANUAL CHECK

- ☐ Toast tells the Incharge the next step (registration + approval)
- ☐ ✕ Incharge cannot give any other role
- ☐ ✕ Incharge cannot appoint a supervisor with no live work order
- ☐ ✕ a mobile belonging to someone outside the Area is refused, not taken over

☐ Pass ☐ Fail Remarks

B4 People directory is limited to the Area

Control 3

Who: Area administrator
Before you start: Two Areas with people.

1. **Admin (Jayant):** Opens People and roles.
2. System: Shows only people with a role or phone in Jayant, plus people attached to no Area yet.

Expected: Nigahi staff are not listed.

MANUAL CHECK

- ☐ ✕ Jayant admin sees no Nigahi or HQ person's mobile or Employee ID

☐ Pass ☐ Fail Remarks

C Raising a complaint

A complaint is raised by the resident or custodian, or by the Overseer/Incharge for a departmental building. Electrical work belongs to the E&M Department and is refused with a pointer to it.

C1 Resident raises a normal complaint

Lifecycle §3

Who: Resident
Before you start: Signed in as resident.

1. **Resident:** Home → Report a problem → Step 1 "What needs fixing?" (category and sub-category, English/Hindi).
2. **Resident:** Step 2: describe the problem, take a photograph in the app.
3. **Resident:** Step 3: Check and send.
4. System: Ticket number AREA/YEAR/NNNNN (e.g. JNT/2026/00042) in state Raised; Overseer notified.

Expected: Complaint appears in "My complaints" and in the Overseer's queue.

MANUAL CHECK

- ☐ Ticket number follows Area/year/5-digit format
- ☐ Raised state shown with plain wording
- ☐ Overseer of that Area sees it; no other Area does
- ☐ Photograph taken in-app, no gallery picker

☐ Pass ☐ Fail Remarks

C2 Emergency complaint

Decision 3; control 8

Who: Resident
Before you start: Sub-category marked "can be emergency" (e.g. no water, burst pipe, sewage overflow, structural crack, manhole cover).

1. **Resident:** Ticks "This is an emergency" in step 2.
2. System: Emergency SLA and faster escalation (L2 at 2 h after breach, L3 6 h, L4 12 h). Top of the inspection queue.
3. **Overseer:** May downgrade misuse; the contractor cannot.

Expected: Emergency badge on the complaint everywhere.

MANUAL CHECK

- ☐ Emergency option appears only for eligible sub-categories
- ☐ ✗ an ineligible type cannot be sent as emergency
- ☐ ✗ contractor cannot downgrade an emergency

☐ Pass ☐ Fail Remarks

C3 Out-of-scope work (electrical, common areas)

§7 out of scope

Who: Resident
Before you start: —

1. **Resident:** Chooses Electrical.
2. System: Refuses: "Electrical complaints are handled by the E&M Department". The excluded-scope notice lists what the portal does not handle with Area contact numbers, English and Hindi.

Expected: No ticket is created.

MANUAL CHECK

- ☐ Refusal message shown
- ☐ Excluded-scope notice visible with Area phone number

☐ Pass ☐ Fail Remarks

C4 Complaint for a departmental building

Decision 27

Who: Civil Overseer or Incharge
Before you start: Building under direct department control.

1. **Officer:** Raises the complaint from "Other buildings".
2. System: Follows the same lifecycle; no occupant confirmation; the Overseer's inspection is the only check; closure on inspection.

Expected: Ticket raised by officer.

MANUAL CHECK

- ☐ Officer can raise for the building
- ☐ No occupant feedback step
- ☐ ✕ HQ roles cannot raise complaints

☐ Pass ☐ Fail Remarks

D Verification, rejection and assignment

The Civil Overseer verifies every complaint, which fixes the SLA figures. The Incharge or the Overseer assigns it to a contractor supervisor; the database prepares the job card at the first assignment.

D1 Overseer verifies a complaint

Control 4; §5.3

Who: Civil Overseer
Before you start: Ticket Raised.

1. **Overseer:** Work queue → opens complaint in the side panel → Verify.
2. System: State Verified. SLA response/completion deadlines are fixed from the SLA table at this moment and can never be changed by anyone.

Expected: Deadline shown on the complaint.

MANUAL CHECK

- [ ] Deadline appears after verification
- [ ] ✗ no screen offers editing the deadline
- [ ] ✗ a later SLA-table change does not alter this complaint

☐ Pass ☐ Fail Remarks

D2 Overseer rejects a complaint

Lifecycle

Who: Civil Overseer, Resident
Before you start: Ticket Raised.

1. **Overseer:** Reject → reason compulsory.
2. System: State Rejected; resident sees the reason and is offered "Contest this decision" (see J1).

Expected: Resident sees reason.

MANUAL CHECK

- [ ] Reject disabled until a reason is given
- [ ] Resident sees the reason
- [ ] Resident sees "Contest this decision"

☐ Pass ☐ Fail Remarks

D3 Assign to a contractor supervisor

§5.3, §5.5 job card

Who: Incharge or Overseer
Before you start: Ticket Verified; live contract with approved supervisor.

1. **Officer:** Assign → chooses supervisor (firm shown under each name).
2. System: State Assigned. Job card JC/<ticket no> prepared automatically. Contractor's SLA clock starts. Complaint counts against that supervisor's contract.

Expected: Job appears in the supervisor's "Today's jobs".

MANUAL CHECK

- [ ] Supervisor list shows the firm
- [ ] Job card created with number JC/...
- [ ] Supervisor gets notification
- [ ] ✗ contractor cannot see other contractors' jobs

☐ Pass ☐ Fail Remarks

D4 Bulk assignment

Configuration bulk_assign_max

Who: Incharge
Before you start: Several Verified tickets.

1. **Incharge:** Selects several rows → Bulk assign (up to 200).
2. System: Each ticket assigned independently; one refusal does not fail the rest.

Expected: Result shows how many assigned.

MANUAL CHECK

- [ ] Each selected ticket moves to Assigned
- [ ] A ticket that cannot be assigned is reported, others still succeed

☐ Pass ☐ Fail Remarks

D5 Reassignment

Transition table

Who: Incharge or Overseer
Before you start: Ticket Assigned, not started.

1. **Officer:** Assign again to another supervisor.
2. System: Recorded in history; attribution follows the new supervisor's contract.

Expected: New supervisor sees the job; old does not.

MANUAL CHECK

- [ ] Old supervisor no longer sees it
- [ ] History shows both assignments

☐ Pass ☐ Fail Remarks

D6 Referred for special repair at verification

Lifecycle

Who: Overseer (at Raised) / Incharge (at Verified)
Before you start: Work beyond the maintenance contract.

1. **Officer:** Refer for special repair with reason.
2. System: Goes to the Area Civil Staff Officer; only the Staff Officer closes it.

Expected: State Referred for Special Repair.

MANUAL CHECK

- [ ] Staff Officer sees it
- [ ] ✕ Overseer cannot close a referred complaint

☐ Pass ☐ Fail Remarks

E Contractor's work

The contractor supervisor starts the job naming the workmen, records materials used, photographs before and after, and claims completion. The contractor can only claim; it can never close.

E1 Start work naming the workmen

§5.5 whole life of the job

Who: Contractor Supervisor
Before you start: Job Assigned to this supervisor.

1. **Supervisor:** Today's jobs → job → Start work → names the workmen.
2. System: State In Progress; the workmen are written into the permanent history of this round.

Expected: Job shows In progress.

MANUAL CHECK

- [ ] Workmen names required
- [ ] Names appear in the job card's Life of the job for this round

☐ Pass ☐ Fail Remarks

E2 Record materials used

§5.5 materials; control 9

Who: Contractor Supervisor
Before you start: Job In Progress (or Rework restarted).

1. **Supervisor:** Materials used → Add material (from the master; quantity; unit shown).
2. **Supervisor:** May Withdraw own unverified line with a reason (line stays, struck through).
3. System: No rate, price or amount anywhere. Line can never be edited.

Expected: Lines show "Civil verifies at inspection".

MANUAL CHECK

- [ ] Add material only while work is under way
- [ ] ✕ cannot add before starting or after the completion claim
- [ ] Withdraw needs a reason; NOT: no edit of a line
- [ ] No money field anywhere

☐ Pass ☐ Fail Remarks

E3 Before and after photographs

§5.5 before and after photographs; control 2

Who: Contractor Supervisor
Before you start: Job In Progress.

1. **Supervisor:** Takes Before photographs (1–3) and After photographs (1–3) in the app. Slots show "n of 3".
2. System: Each photograph is fingerprinted on arrival. A 4th of either kind in the same round is refused.

Expected: Mark complete becomes available.

MANUAL CHECK

- [ ] Mark complete disabled until at least 1 before and 1 after
- [ ] ✕ 4th before or 4th after photo refused
- [ ] No gallery upload option
- [ ] A new round (rework/reopen) needs fresh photographs

☐ Pass ☐ Fail Remarks

E4 Claim completion

Control 1

Who: Contractor Supervisor
Before you start: Photographs in place.

1. **Supervisor:** Mark complete.
2. System: State Work Completed (a claim). Contractor's clock for this round stops. Complaint enters the Overseer's inspection queue.

Expected: Job moves to "Awaiting inspection".

MANUAL CHECK

- [ ] Contractor clock stops at claim
- [ ] ✕ contractor has no Close or Inspect action

☐ Pass ☐ Fail Remarks

E5 What the contractor can never see or do

README §2; control 3

Who: Contractor, Contractor Supervisor
Before you start: —

1. **Contractor:** Browses own jobs, own work order and scorecard.
2. System: Objections, disputes, Staff Officer decisions, residents' answers, material anomalies and verifying officer names are hidden. Resident personal data is not shown.

Expected: Contractor sees only its own contract.

MANUAL CHECK

- [ ] ✕ no objections visible
- [ ] ✕ no dispute or review events in the timeline
- [ ] ✕ no other contractor's jobs or work orders
- [ ] ✕ no anomaly report
- [ ] Access ends automatically when the contract ends

☐ Pass ☐ Fail Remarks

F Resident during the work

While work is under way the resident can object. Only departmental officers may pause the SLA clock, and only for the occupant or force majeure.

F1 Objection while work is under way

Decision 16; control 4

Who: Resident, Overseer, Incharge
Before you start: Ticket Assigned / In Progress.

1. **Resident:** Complaint → Object, with words and optional photograph.
2. System: Notified to the Overseer and Incharge, not the contractor. Overseer must respond within 24 h. Objection counter rises automatically.
3. **Overseer:** Responds to the objection.

Expected: Resident sees the response.

MANUAL CHECK

- ☐ Overseer and Incharge notified
- ☐ ✕ contractor not notified and cannot see it
- ☐ Objection count shown on reports; NOT: editable by anyone

☐ Pass ☐ Fail Remarks

F2 Pause and resume the SLA clock

Control 6

Who: Overseer / Incharge
Before you start: Quarter locked or access refused, or force majeure.

1. **Officer:** Pause → reason: Occupant or Force majeure, with words.
2. **Officer:** Resume when cleared. Deadline moves forward by the paused interval.

Expected: Pause history listed on the complaint.

MANUAL CHECK

- ☐ Only Occupant and Force majeure are offered
- ☐ ✕ contractor cannot pause
- ☐ ✕ "want of material/labour" is not a pause reason
- ☐ Paused time is deducted from the contractor's clock

☐ Pass ☐ Fail Remarks

G Inspection and closure

Two-key closure: the contractor claims, only the Civil Overseer inspects and accepts, on site, from the app, with their own geo-tagged photograph taken after the claim. The inspector may never be the person the work was assigned to.

G1 Inspection queue order

Control 8

Who: Civil Overseer
Before you start: Several claimed jobs.

1. **Overseer:** Opens the inspection queue.
2. System: Order: emergencies → priority set by Overseer/Incharge → premises type → date verified. Never by the contractor's claim time.

Expected: Queue in departmental order.

MANUAL CHECK

- ☐ Emergency at the top
- ☐ Setting an inspection priority moves a job up
- ☐ ✕ an earlier contractor claim does not move it up

☐ Pass ☐ Fail Remarks

G2 Inspect and accept (on site, in the app)

Controls 1, 2

Who: Civil Overseer
Before you start: Ticket Work Completed; Overseer signed in with the phone.

1. **Overseer:** Takes the inspection photograph in the app (location and time embedded) → Inspect and accept.
2. System: Refused unless: device session (not password), Overseer's own photograph, taken after the claim, with location, and Overseer is not the person the work was assigned to.

Expected: State Inspected & Accepted; resident asked to confirm.

MANUAL CHECK

- ☐ Accept works only from the phone
- ☐ ✕ refused in a web password session
- ☐ ✕ refused with another person's photo or a photo older than the claim
- ☐ ✕ refused if the Overseer is the assignee person

☐ Pass ☐ Fail Remarks

G3 Return for rework

Controls 2, 4

Who: Civil Overseer
Before you start: Ticket Work Completed.

1. **Overseer:** Return for rework with remark (inspection photograph).
2. System: State Rework; rework counter rises (against the contractor); contractor's clock reopens; a new round begins on the job card.
3. **Supervisor:** Restarts, takes fresh before/after photographs, claims again.

Expected: Job card shows round 2 "Sent back by the Overseer" with the remark.

MANUAL CHECK

- ☐ Remark compulsory
- ☐ Old photographs do not satisfy the next claim
- ☐ Contractor time added across rounds

☐ Pass ☐ Fail Remarks

G4 Batch inspection from one visit

batch_inspect_max

Who: Civil Overseer
Before you start: Several claimed jobs at one site.

1. **Overseer:** Selects up to 50 → Accept from this visit.
2. System: Each checked independently.

Expected: Each accepted job moves on.

MANUAL CHECK

- [ ] Each ticket checked against the same gates
- [ ] One refusal does not fail the others

☐ Pass ☐ Fail Remarks

G5 Verify materials

§5.5 materials

Who: Overseer or Incharge
Before you start: Ticket Work Completed or Inspected & Accepted.

1. **Officer:** Materials section → Verify each line (claimed quantity prefilled; may enter less or 0; remark).
2. **Officer:** Verify again needs a reason; a second officer's confirmation is recorded too.

Expected: Verified quantities visible to the contractor (not who verified).

MANUAL CHECK

- [ ] ✗ the person who claimed cannot verify
- [ ] Re-verify asks for reason
- [ ] Changes shows old → new

☐ Pass ☐ Fail Remarks

G6 Close the complaint

Lifecycle

Who: Overseer or Incharge
Before you start: Inspected & Accepted, no dispute by the occupant.

1. **Officer:** Close.
2. System: State Closed; 24-hour reopen window for the occupant opens. After 30 days the complaint leaves working screens (still in search).

Expected: Resident may confirm, rate or reopen within 24 h.

MANUAL CHECK

- [ ] Close available only after acceptance
- [ ] ✗ contractor cannot close
- [ ] ✗ complaint at escalation level 4 cannot close without a Staff Officer remark

☐ Pass ☐ Fail Remarks

H Resident after the work

The resident's confirmation runs alongside the inspection, never instead of it. A dispute — before or after closure — reopens the same ticket, never a new one.

H1 Resident confirms and rates

§5.3

Who: Resident
Before you start: Inspected & Accepted or Closed.

1. **Resident:** Complaint → Fixed → rating 1–5 and words.
2. System: Recorded in permanent history; job card status "complainant satisfied — job complete".

Expected: Rating shown in reports.

MANUAL CHECK

- ☐ Rating saved
- ☐ Job card status changes to satisfied

☐ Pass ☐ Fail Remarks

H2 Resident says "Not fixed" before closure

§5.5 disputing before closure

Who: Resident, Overseer
Before you start: Inspected & Accepted, not yet closed.

1. **Resident:** Not fixed → takes a photograph → reason.
2. System: Complaint is Reopened (same ticket), exactly as after closure; reopen counter rises.
3. **Overseer:** Close is no longer offered; reassigns for a new round.

Expected: Overseer cannot close over the resident's head.

MANUAL CHECK

- ☐ Photograph compulsory
- ☐ ✕ Overseer has no Close action on a reopened complaint
- ☐ Job card shows "complainant not satisfied" and a new round

☐ Pass ☐ Fail Remarks

H3 Reopen after closure within 24 hours

Lifecycle

Who: Resident
Before you start: Closed less than 24 h ago.

1. **Resident:** Reopen → photograph → reason.
2. System: Reopened; reassigned by Overseer/Incharge; counted as a reopening against the contractor.

Expected: Same ticket number continues.

MANUAL CHECK

- ☐ Reopen offered within 24 h
- ☐ ✕ after 24 h, reopen is no longer offered
- ☐ ✕ a new ticket is not created

☐ Pass ☐ Fail Remarks

J Disputes decided in writing by the Staff Officer

A rejection can be contested once; repeated reopening is referred to the Area Civil Staff Officer, whose written decision is final in the portal.

J1 Resident contests a rejection — officer reinstates

§5.5 contesting a rejection

Who: Resident, Overseer or Incharge
Before you start: Ticket Rejected; not contested before.

1. **Resident:** Contest this decision → reason.
2. System: Dispute sent to Overseer and Incharge (Disputes page and panel).
3. **Overseer/Incharge:** Reinstate with note.
4. System: Complaint returns to Raised for verification.

Expected: Resident sees "Review of your complaint" with the note.

MANUAL CHECK

- ☐ Contest offered once only
- ☐ Reason compulsory
- ☐ Note compulsory for the officer
- ☐ Complaint back in verification queue

☐ Pass ☐ Fail Remarks

J2 Contest upheld by officer → Staff Officer decides

§5.5

Who: Overseer/Incharge, Staff Officer
Before you start: Contested rejection.

1. **Overseer/Incharge:** Uphold with note.
2. System: Goes automatically to the Area Civil Staff Officer.
3. **Staff Officer:** Disputes → writes the decision → Reinstate or Uphold → Record decision.

Expected: Decision visible to resident, Overseer and Incharge.

MANUAL CHECK

- ☐ Record decision disabled until the decision is written
- ☐ Warning that the resident cannot dispute again
- ☐ Resident sees the role ("Area Civil Staff Officer"), not the name

☐ Pass ☐ Fail Remarks

J3 Third reopening → referred to the Staff Officer

§5.5 repeated disputes

Who: Resident, Staff Officer, Overseer
Before you start: Same complaint reopened for the 3rd time (configurable).

1. System: Refers the complaint to the Staff Officer; banner "cannot be reassigned until then"; repeat-complaints card flags it.
2. **Overseer/Incharge:** No Assign, Close or Refer action is offered.
3. **Staff Officer:** Decides in writing: Redo the work / Close the complaint / Refer for special repair.

Expected: Only the Staff Officer's decision moves it.

MANUAL CHECK

- ☐ ✕ no reassignment before the decision
- ☐ Redo → Overseer/Incharge can reassign
- ☐ Close → state Closed
- ☐ Special repair → referred

☐ Pass ☐ Fail Remarks

J4 After the Staff Officer's decision

§5.5

Who: Resident
Before you start: Decision recorded.

1. **Resident:** Opens complaint.
2. System: No contest, reopen or "not fixed" buttons. Message: decided by the Area Civil Staff Officer; further disputes are not taken in the portal; write to the Area Civil Office.

Expected: No further dispute possible in the portal.

MANUAL CHECK

- [ ] Message displayed
- [ ] ✕ reopen refused even within 24 h
- [ ] ✕ contractor never sees the decision

☐ Pass ☐ Fail Remarks

K Special repair, SLA and escalation

Beyond-contract work, the contractor's clock and four-level escalation.

K1 Refer for special repair during work

Lifecycle

Who: Overseer or Staff Officer
Before you start: Ticket In Progress.

1. **Officer:** Refer for special repair with reason.
2. **Staff Officer:** Closes it when the special repair is done.

Expected: Leaves the contractor's list.

MANUAL CHECK

- [ ] ✕ only the Staff Officer can close it

☐ Pass ☐ Fail Remarks

K2 Contractor's SLA clock across rounds

§3; control 4

Who: System
Before you start: Complaint with rework and reopening.

1. System: Adds every period in the contractor's hands (assignment→claim, send-back→claim, reassignment→claim), less recorded pauses; compares with the SLA fixed at verification.

Expected: Officers see deadline and contractor figure; contractor sees own clock.

MANUAL CHECK

- [ ] Department's waiting time (verification, assignment, inspection) not counted
- [ ] Paused time deducted
- [ ] ✕ no one can edit minutes or met/missed flag

☐ Pass ☐ Fail Remarks

K3 Breach and four-level escalation

Decision 4; control 4

Who: System, Overseer → Incharge → Staff Officer → GM
Before you start: Deadline passed.

1. System: Hourly sweep records the breach. L1 Overseer at breach; L2 Incharge (emergency +2 h, normal +1 day); L3 Staff Officer (+6 h / +3 days); L4 GM Civil (+12 h / +7 days).
2. **Staff Officer:** L4 complaint needs a Staff Officer remark before it can close.
3. **Officer:** Attributes the breach: Contractor, Department, Occupant, Force majeure.

Expected: Escalation level visible; breaches listed.

MANUAL CHECK

- [ ] Notifications reach each level
- [ ] Escalation counter not editable
- [ ] Attribution recorded with who and when

☐ Pass ☐ Fail Remarks

L Job card

Prepared by the database at first assignment; read by the Overseer and above; changed only by the Overseer or Incharge; every round recorded.

L1 Fill in and correct the job card

§5.5 job card; control 9

Who: Overseer or Incharge
Before you start: Ticket assigned.

1. **Overseer:** Job card → Fill in scope of work and site notes (no reason needed for a blank).
2. **Overseer:** Correct written text → reason compulsory. Add work items (description, unit, estimated quantity — no rates); Change / Withdraw with reason.
3. System: Locked once closed or rejected. Every change logged with old → new.

Expected: Changes tab shows the log.

MANUAL CHECK

- ☐ Save disabled until reason given for a correction
- ☐ Withdrawn item stays struck through
- ☐ ✕ no delete
- ☐ ✕ no edit after closure
- ☐ ✕ resident and contractor cannot open the job card

☐ Pass ☐ Fail Remarks

L2 Life of the job and printing

§5.5 whole life of the job

Who: Overseer and above
Before you start: Complaint with several rounds.

1. **Officer:** Job card → Life of the job — N rounds; or Print (A4 with signature blocks for supervisor, Overseer, Incharge).

Expected: Each round shows supervisor, start, workmen, materials, photos count, claim, inspection, closure, resident's answers, reopening.

MANUAL CHECK

- ☐ Round 1 details still present after reopening
- ☐ Status chip correct (work in hand / awaiting / not satisfied / satisfied)
- ☐ Prints on one A4 page

☐ Pass ☐ Fail Remarks

M Work orders and contracts

Filled in by the Incharge or Staff Officer; every change needs a reason; completion date moves only by numbered extension.

M1 Enter a work order

§5.5 work orders

Who: Incharge / Staff Officer
Before you start: —

1. **Incharge:** Work orders → New: firm and address, contract/LOA no., agreement no., name of work, award, site-handover, start and completion dates, remarks.
2. System: Completion date as awarded is kept for ever.

Expected: Card shows term status chip.

MANUAL CHECK

- [ ] ✕ completion before start refused
- [ ] Several live contracts per Area allowed
- [ ] Duplicate agreement number refused

☐ Pass ☐ Fail Remarks

M2 Correct, extend and attach

§5.5

Who: Incharge / Staff Officer
Before you start: Live work order.

1. **Incharge:** Correct a field (reason). Record extension (order no., date, reason) — cannot be changed later. Attach contract copy (PDF/JPEG, 10 MB, fingerprint shown).
2. **Anyone in the Area:** History tab shows old → new with reason.

Expected: Extended contract shows original date too.

MANUAL CHECK

- [ ] Completion date not in correction dialog
- [ ] Extension must run beyond current date
- [ ] Document fingerprint checked on download
- [ ] ✕ Overseer/HQ/contractor read only

☐ Pass ☐ Fail Remarks

M3 Handover and expiry

§5.3

Who: Incharge / Staff Officer; System
Before you start: Successor contract awarded.

1. **Officer:** Handover → open complaints move to the incoming contractor with a clean cut-off; outgoing record frozen.
2. System: Expiry warning 30 days ahead; supervisors' phones cut off on expiry day.

Expected: Outgoing contractor inherits neither blame nor credit.

MANUAL CHECK

- [ ] Open tickets move to successor
- [ ] Warning appears at 30 days
- [ ] Supervisor cannot sign in after expiry

☐ Pass ☐ Fail Remarks

N Materials reports and master

A record, never a bill.

N1 Consumption and anomalies

§5.5 materials

Who: Overseer and above
Before you start: Claims recorded.

1. **Officer:** Materials → Consumption (contract, dates, CSV): claimed, verified, unverified, variance.
2. **Officer:** Anomalies: claimed more than verified; above normal per job; same material same premises within 90 days; passed inspection unverified.

Expected: Rows open the complaint.

MANUAL CHECK

- ☐ "Quantities only; no rates" shown
- ☐ CSV downloads
- ☐ ✕ contractor cannot see anomalies

☐ Pass ☐ Fail Remarks

N2 Materials master

§5.5

Who: HQ System Administrator
Before you start: —

1. **Admin:** Add material (code, English/Hindi name, unit, category, normal maximum per job); edit with reason; deactivate (never delete).

Expected: Deactivated material no longer offered to supervisors.

MANUAL CHECK

- ☐ Code cannot be changed
- ☐ Reason compulsory
- ☐ ✕ no delete

☐ Pass ☐ Fail Remarks

P Dashboards, search and notifications

Live work on dashboards; history through search.

P1 Area dashboard and repeat complaints

Decision 24

Who: Overseer, Incharge, Staff Officer, GM
Before you start: Live data.

1. **Officer:** Area dashboard: cards with amber/red thresholds; delay attribution; repeat complaints (same quarter, same fault, 3+ reports counting complaints and reopenings, "Staff Officer decision pending" chip); inspection backlog warning at 48 h.

Expected: Figures match the queue.

MANUAL CHECK

- ☐ Repeat card shows reports count
- ☐ Pending chip shown for referred complaint
- ☐ Archived complaints not on dashboard

☐ Pass ☐ Fail Remarks

P2 Contractor scorecard and performance report

Control 9

Who: Incharge, Staff Officer, GM, contractor (own)
Before you start: —

1. **Officer:** Scorecard / contract performance (CSV): SLA met, rework rate, objection rate, reopen rate — counted by complaints, not events.

Expected: States "penalty decisions rest with the department".

MANUAL CHECK

- ☐ ✗ no penalty, deduction or ₹ figure anywhere
- ☐ Rates defined by complaints

☐ Pass ☐ Fail Remarks

P3 HQ overview

README §2

Who: GM Civil, Directors, CMD
Before you start: All Areas.

1. **HQ:** All-Areas overview ranked by SLA compliance; meeting mode rotates every 12 s.

Expected: Read-only across all 13 Areas.

MANUAL CHECK

- ☐ ✗ HQ cannot change any complaint
- ☐ All Areas visible

☐ Pass ☐ Fail Remarks

P4 Search

§5.5 search

Who: Officers (each within their own scope)
Before you start: Complaints exist.

1. **User:** Search: complaint number, quarter, description, fault names (English/Hindi), word beginnings ("leak" → leakage), filters; includes archived.

Expected: "water" finds water-supply and leakage complaints.

MANUAL CHECK

- ☐ Search by quarter works
- ☐ Search by partial word works
- ☐ Archived (30+ days) complaints found

☐ Pass ☐ Fail Remarks

P5 Notifications

—

Who: All roles
Before you start: —

1. **User:** Alerts / Notifications inbox; mark read. Resident told at each step (English/Hindi).

Expected: Each transition notifies the right people.

MANUAL CHECK

- [ ] Resident notified of verification, assignment, closure
- [ ] Officers notified of objections and escalations

☐ Pass ☐ Fail Remarks

S Administration and the controls themselves

Checks that the nine controls hold, whatever screen is used.

S1 Settings, SLA figures and dashboard cards

Decision 2, 24; control 4

Who: HQ System Administrator; Incharge (SLA)
Before you start: —

1. **Admin:** Administration → Settings (reopen window, archive days, etc.), SLA figures (also Incharge; audit-logged, apply to new complaints only), Dashboard cards (order, thresholds, shown), Photo storage (usage, purge after 2 years).

Expected: Changes logged with old value.

MANUAL CHECK

- ☐ SLA change does not affect open complaints
- ☐ ✕ administrator cannot move a complaint's state
- ☐ ✕ administrator cannot change counters or deadlines

☐ Pass ☐ Fail Remarks

S2 Area isolation

Control 3; §5.3

Who: Officer of Area X
Before you start: Complaint in Area Y.

1. **Officer:** Opens a complaint number or link from another Area.
2. System: Answers "not found", not "forbidden".

Expected: No data of the other Area visible by any route.

MANUAL CHECK

- ☐ Not found for other Area's complaint
- ☐ Lists, search, dashboards show own Area only

☐ Pass ☐ Fail Remarks

S3 History and audit cannot be altered

Control 7

Who: Any
Before you start: —

1. **Anyone:** Looks for edit/delete on history, audit, job card log, work order history.
2. System: None exist; the database refuses changes. Purge only after 2-year retention.

Expected: Immutable record.

MANUAL CHECK

- ☐ ✕ no edit or delete on any history
- ☐ Photograph purge keeps location, time and fingerprint

☐ Pass ☐ Fail Remarks

S4 Evidence only — no money

Control 9

Who: Any
Before you start: —

1 **Anyone:** Reviews every screen and export.

Expected: No rate, price, penalty, bill or amount anywhere.

MANUAL CHECK

☐ ✕ no ₹ figure in scorecard, materials, job card or CSV

☐ Pass ☐ Fail Remarks

Summary of results

ID	Scenario	Pass	Fail	Remarks
A1	Resident registers a phone for their quarter	☐	☐
